

**Jon Mihalic, PMP**

Director

Jon Mihalic has 17 years experience in project management and controls in various industries including construction, information technology, telecommunications and environmental restoration. Mr. Mihalic spent nine years with Bechtel supporting projects in design engineering, acquisition, project management and project controls. He joined Booz Allen Hamilton in 2000 and established the Quantitative Management Controls service offering. This service offering has grown to over 100+ project management practitioners who provide strategic and tactical services that improve clients' project, program and portfolio management effectiveness. Also, he is a recognized speaker in project management and earned value management systems.

Mr. Mihalic has held various roles within PMI as a member and volunteer since 2000. He is an acknowledged contributor of text and concept to PMI's *Practice Standard for Earned Value Management*, and was the key coordinator for Booz Allen Hamilton staff participation in the initial pilot of *OPM3*[®]. In addition, he represents his firm on PMI's Global Corporate Council.

Mr. Mihalic serves on the Association for the Advancement of Cost Engineering (AACE) certification board, and in 2004 he was the chair for the creation of their Earned Value Professional (EVP) certification. In recognition of his promotion of the project management profession, Mr. Mihalic was chosen as one of the "Power 50" leaders in Project Management in *PM Network* magazine.

Mr. Mihalic holds a degree in Industrial Management from Gannon University and an MBA from Youngstown State University. He has earned the Project Management Professional (PMP)[®], Certified Cost Consultant (CCC)[®] and Earned Value Professional (EVP)[®] credentials.

About PMI

Project Management Institute (PMI.org) is the leading advocate for the project management profession globally. Founded in 1969, PMI has nearly 500,000 members and credential holders in 175 countries. PMI's Project Management Professional (PMP)[®] credential is recognized as the only globally-transferrable credential in project management.
