CHAPTER 29	“The Future of Project Management Education and Training Circa 2025” <i>Jang Ra</i> .....	505

# Preface

---

A significant body of book literature in project management has evolved over the last 50 years. This literature has addressed a wide range of approaches to the management of projects, including theory, processes, and principle.

Edmund Gosse (1840-1928) noted that “The Future comes like an unwelcome guest.” Unfortunately there has been little literature on what the likely future of project management might be. In order to fill that void, this book will present the likely future of project management in terms of the possibilities and probabilities of how the discipline will be used to manage the tactical and strategic changes that will impact current and forthcoming products, services, and organizational processes.

As the technological, economic, political, legal, and competitive world changes, what strategies should be developed and implemented to facilitate survival and growth? The evaluations are done by professionals who have extraordinary credentials in the use of project management, and are the best qualified to identify and evaluate the likely future changes in their environment.

We believe that this first-of-its-kind book will create awareness of what future changes can be expected in the use of project management. The thoughts contained can be used to facilitate the management of current and future change.

David I. Cleland, Ph.D.  
Bopaya Bidanda, Ph.D.
