

Our Trademarks

27 September 2016

The word marks and logos included here are those currently used as trademarks by PMI. This list is not all-inclusive.

The Legal Department prepares this list based on our registered and unregistered trademarks. Except for PMI logos, entries appear in alphabetical order starting with PMI's certification marks.

Note: An omission from this list does not constitute a waiver of any intellectual property rights that PMI may have established in any other marks. All registered marks are registered in the United States and/or other countries.

PMI LIST OF TRADEMARKS

Trademark Usage Guidelines

As PMI's trademarks are an important business asset, we must be steadfast in our efforts to protect them. PMI employees, members, volunteers, communities, Registered Education Providers (R.E.P.s), certification holders, licensees, and other third parties can help in these efforts by using the marks properly and providing appropriate attribution.

The following trademark usage guidelines apply to everyone using PMI marks. There are exceptions, namely, individuals and organizations that are under license with PMI should follow the special trademark guidelines provided to them, pursuant to their respective agreements. The guidelines below will be updated periodically by PMI.

These guidelines are not intended to be a comprehensive guide for all legal uses. Related questions should be directed to PMI's Legal Department.

1.  Avoid using PMI marks to refer to your own goods or services. Third parties may not incorporate any PMI mark into their own product names, services, trademarks, logos, company names, domain names or URLs. Registered Education Providers, colleges and training centers may continue to use PMI's certification marks in course headings (i.e., "PMP[®] Exam Prep 101"), provided notice is given that the mark is owned by PMI.
2.  Avoid using marks that are confusingly similar to PMI's marks.
3.  Avoid altering any PMI mark. PMI marks or logos may not be changed in any way. They must be used exactly as they appear on the [PMI List of Marks](#).
4.  Avoid using the PMI Logos without authorization. Only third parties expressly authorized by PMI to use the PMI Logos (i.e., by executed written agreement) may do so. In such cases, only the PMI approved artwork for the specific logo may be used.
5.  Avoid using the PMP Certification Logo without authorization. Only PMP certification holders in good standing are authorized to use the PMP logo, which may only be used on business cards in close proximity to the certification holder's name.
6.  Always use the proper trademark notice with PMI marks.
 - a. Use of the appropriate symbol depends upon the registration status of the mark. The [®] symbol should only appear with a mark that has been registered with the U.S. Patent and Trademark Office or the trademark office of another country; [™] may appear after an unregistered mark that is used on either goods or services; and SM may appear after an unregistered mark that is used specifically in connection with services. The appropriate trademark notice should appear in superscript format ([™], SM, [®]) following the mark.

- b. It is correct to use the ® symbol whenever a registered mark is cited in connection with the goods or services for which it is registered.

In print or electronic documents, publications or communications, it is sufficient to use the appropriate trademark notice following the mark when it first appears in the work. There is one exception: the PMBOK mark in the *PMBOK® Guide*, which always carries the superscripted ® after the mark.

For PMI's serial publications, the appropriate symbols can be used with the marks once per article (the first appearance, short article) or more often (the first appearance per page), if it seems warranted. For web content, the appropriate symbol should appear with the mark on the first appearance per web page.

7.  Always use PMI marks when referring to PMI goods and services. Third parties are free to use PMI word marks (not PMI logos) to refer to PMI products and services, as long as such references are truthful, fair, and comply with these guidelines.

8.  Always use the ® after the “PMI” trademark or service mark but not after PMI’s company name or initials. If PMI is used to refer to a product or service, then the ® symbol should be used to identify the PMI trademark or service mark.

Example: The PMI® Certification Program is recognized worldwide.

If the acronym “PMI” refers to the business/company name, it is being used as a *trade name* and the ® symbol should not be used.

Example: PMI is the world’s leading association relating to project management.

Example: Project Management Institute (PMI), Newtown Square, PA 19073-3299.

When used as a trade name, “PMI” can appear in the possessive case.

Example: PMI’s trademarks are among its most valued assets.

9.  Always use PMI certifications properly. PMI certifications may only be used by authorized individuals to show that they have met their respective certifications. A certification appears immediately following a certification holder’s name, for example on business cards. Used in this manner, the mark does not require use of the ® symbol, nor is an attribution statement required. **Important Note:** Any certified individual whose certification has lapsed should immediately discontinue use of the certification.

- 
10. Always use the generic term after a word mark wherever possible. To be properly protected, a word mark (excluding slogans) should not be used as a noun—it should be used as an adjective followed by a generic noun, e.g., *PMBOK*[®] *Guide* or PMP[®] certification or PMI[®] seminars, etc. Use of “PMP” by itself is discouraged. Also, pluralizing a certification, such as “PMPs” is incorrect. Instead, PMI recommends using “PMP[®] certification holders.”

- 
11. Always use the registration ® symbol following a registered mark when used in connection with its registered goods or services. If a registered mark is being used in connection with products or services for which it is not registered, the TM symbol should be used in place of the ® symbol.

Important Note: PMI staff should contact the Legal Department when use of a PMI mark has expanded beyond the goods or services for which it is registered. Additional trademark protection may be warranted.

- 
12. Always use marks in their proper format. A mark that has been registered in a specific format should bear the superscripted registration symbol [®] only when used in that particular format. Conversely, text-only marks, such as “PMI” or “*PMBOK*” may be used with the superscripted registration symbol [®] in either stylized or typed format.

- 
13. Always provide an attribution statement when using PMI trademarks. Each document or product in which any PMI mark appears (e.g., in marketing materials, white papers, advertisements, news releases, brochures, web pages, etc.), whether in print or electronic form, should contain an attribution statement at or near the first appearance of the mark, or if multiple marks appear, in a logical and prominent place within the document.

- a. Registered Marks. Registered marks are marks that are registered with the U.S. Patent and Trademark Office. If the PMI List of Trademarks indicates that the mark is registered, the attribution statement should include the word “registered,” as follows:

“PMI” and “PMP” are registered marks of Project Management Institute, Inc.

- b. Unregistered Marks or a Combination of Marks. If the marks are not registered, or if the attribution statement includes both registered and unregistered marks, the word “registered” should be omitted:

“PMI,” “PMP” and “PROJECT MANAGEMENT TOOLKIT FOR TEACHERS” are marks of Project Management Institute, Inc.

PMI employees and/or contractors producing materials for PMI may forego the use of a narrative attribution statement in instances where spatial limitations render inclusion impractical. In such instances, use of the circle ®, TM, or SM notices must be faithfully observed.

14.  Always report any suspected infringement of PMI's marks to the Legal Department.
