

# New Item Types

Match each process in Project Stakeholder Management with its associated Process Group. (Drag the correct process to the yellow destination. Note all process groups will not be used.)

## Process

Identify Stakeholders

Monitor Engagement

Manage Engagement

Plan Engagement

Control Stakeholders

## Process Group

Planning

Executing

Monitoring & Controlling

Initiating

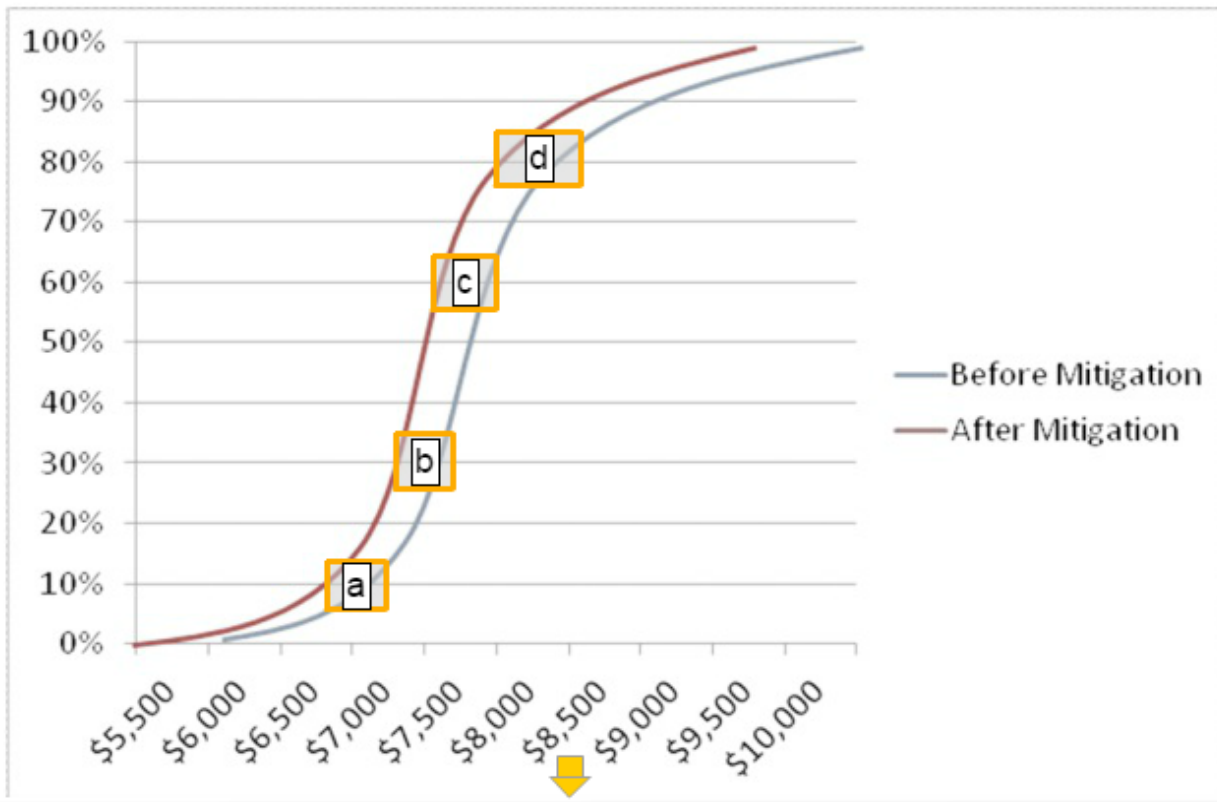

Drag and drop questions

For questions on definitions and process order, the PMP may include items that leverage a drag and drop question. In this prototype, candidates will drag the process to match up to its respective process group.

# New Item Types

Click the area where the cost will increase the most.

Hot spot questions

This next prototype is called a hot spot question. Candidates will be asked to interact with a digital graphic and use their calculations to estimate specific data points.

**PROTOTYPE**

# New Item Types

Scenario about risk describing a specific issue.

Based on the current risk register and the scenario described, which entry should the project manager edit? (enter the correct ID number in the text box).

Risk register:

ID	Description	Likelihood of risk occurring	Impact if risk occurs	Severity	Owner	Mitigation Strategy
1	Something is ill defined	Medium	High	High	...	....
2	Project design incomplete	Low	High	High	...	...
3	Project schedule misunderstood	Low	Medium	Medium	...	...
4	...	...	...	...	...	...
5	...	...	...	...	...	...

Hot spot questions

This next prototype is called a hot spot question. Candidates will be asked to interact with a digital graphic and use their calculations to estimate specific data points.

Both the drag and drop and hot spot questions will be available for PMP exams delivered via computer, both at test centers and via online proctoring.
