“Agile is
about responding
to change rather
than following
a plan.”

The Agile Manifesto

Disciplined Agile brings together hundreds of practices from the world of agile frameworks so you don't have to commit to one prescriptive way of working.

The Disciplined Agile Story...

The best way of working for your team is specific to your team. Yet, you may be tied to a widely used framework like Scrum, or SAFe, or one of the growing number of agile approaches out there.

Sure a framework can help, but the smartest path forward often borrows thinking from several. Framework prison is keeping so many agile organizations from the results they expect.

True business agility comes from freedom, not frameworks.

Disciplined Agile opens your options. It breaks down the best agile practices across frameworks to lead your team to better ways of working.

Yes, a toolkit that gives you the freedom to try different approaches. It provides tailored guidance so you better understand your options and choose the best approach for your situation. You'll continuously improve your Way of Working to increase productivity.

Escape from framework prison and put Disciplined Agile into practice...
